# **Have You Spotted Me?**

### **Living in Spotted Lanternfly Quarantine Areas**

IMPORTANT: Before you move outdoor items check for spotted lanternfly egg masses, adults, and nymphs. Make sure all items are pest free before you move them.

Help keep this pest from spreading by removing and killing them.

### Stop and Report a #HitchHikerBug

Nymph found in late spring / summer.

#### 1. Take a picture:

With the GPS function turned on your cellphone or camera with GPS, take a photograph of any life stage (including egg masses). Upload your photo to Facebook or Instagram, using the hashtag #HitchHikerBug.

If you don't have GPS capabilities and/or access to social media, submit the photo via email to: **HitchHikerBug@state.de.us** Include your name, contact information, and the address or georeference of where the photo was taken.

#### 2. Collect a specimen:

Suspected specimens of any life stage can be collected and placed in a vial or plastic zip-lock bag with the name and contact information of the collector, and turned in to the Delaware Department of Agriculture CAPS program for verification.

Adult - late summer / fall.

Adult - late summer / fall.

### 3. Report a site:

If you can't take a specimen or photograph, call (302) 698-4632 or send an email to: **HitchHikerBug@state.de.us** In the message, provide the location of the sighting and your contact information.

Nymph found in summer prior to adulthood.

Fresh Spotted Lanternfly egg mass on tree bark (outlined in white). Present in fall and winter, blends in with surroundings.
